TRADE LIST

Spring, 1910

CUSTOMERS are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

RESPONSIBILITY.—After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

ALL CLAIMS must be made upon receipt of goods.

TERMS CASH, on or before delivery to express or railroad agents, unless by special arrangement.

Two hundred and fifty, twenty-five or five of any one variety will be furnished at the thousand, hundred, and ten rates, respectively, but single plants of one or more varieties will not be sold at less than 15 cents each, except Vines and Herbaceous Plants, the minimum price of which will be 10 cents each.

PACKING CHARGED EXTRA, but only sufficient to cover cost of time and material consumed in the work.

POST OFFICE ORDERS payable at Dresher P. O., Montgomery Co., Pa.

POSTAL TELEGRAPH OFFICE, DRESHER, PA. Use Nurserymen's Telegraphic Code or "A. B. C." Code, 4th Edition.

VISITORS are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

NOTICE.—It is necessary that you should **TELEPHONE** us (Bell Phone, 226 Ambler; Keystone Phone, Jenkintown 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is $2\frac{1}{2}$ miles from either station.

THE COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock No. 1453.

This is to certify that the stock in the nursery of **THOMAS MEEHAN & SONS, INC.**, of Dresher, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 31st day of March, A. D., 1905, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests.

This Certificate expires August 31, 1910
Dated Harrisburg, Pa., Sept. 11, 1909.
FRANCIS WINDLE, Inspector.

H. B. Critchfield,

Secretary of Agriculture.

MEEHAN'S MALLOW MARVELS MOST BRILLIANT NEW PRODUCTION
OF SCIENTIFIC PLANT BREEDING

Immense flowers from eight to ten inches in diameter, in fiery crimson, rich blood-red, soft shell-pink and clear snowy white. Their great beauty is indescribable. Meehan's Mallow Marvels surpass all other perennials in profuseness of bloom, flowering propensities and brilliancy of color. From late July until October frosts arrive, the flowers continue to appear in profusion. Absolutely hardy, the Mallow Marvels have been tested and are thriving in Canada and in the mountain portions of the Northern States, as successfully as in Georgia and Florida. Of herbaceous character. They come up year after year under varied conditions.

Deciduous Trees

In preparing our list of trees this year we have added a new feature to our catalogue which we believe will prove of additional advantage to our customers. It will be noted that in addition to giving the height and calliper, we state approximately the height from the ground at which the trees are branched, but it should be kept in mind that as our trees have all been grown with single stems, right to the top of the tree, it is possible to trim off the lower branches, should a higher branched tree be required than is shown by our list.

We stake all of our trees with long bamboo poles and in that way we get not only a perfectly straight trunk, but a stem right to the top of the tree.

All of our trees have been several times transplanted. We particularly mention those which have been transplanted within the last three years.

Our object is to grow a first-class tree, well rooted, with straight trunk and a nice top, and we spare no expense to produce a tree of this character. All crooked trees are discarded. Every tree delivered is a good tree. This should be kept in mind when comparing our prices with the "cheap" trees usually offered.

Attention.—When ordering trees, be sure to specify both the height and the calliper as shown in the catalogue. It will be noticed that in many instances trees of the same height are of different calliper and in others they are the same calliper but different height.

12 to 14 ft., $2\frac{1}{2}$ to $2\frac{3}{4}$ in. cal., branched 6 to 7 ft. specimen.....	25 00		

All Norway Maples quoted have been once or more transplanted within the last three years. The trees were selected for their straightness of trunk and general good character. All "culls" and crooked trees were discarded. The specimen trees were particularly selected, transplanted three years ago and set five by five feet apart in nursery rows. They have large well-developed heads.

JAPANESE MAPLES

Our Japanese Maples should not be classed with the cheap imported stock, which is usually hide-bound, crooked and with poorly shaped tops and untrue to name. Our plants are all of our own propagation. The polymorphum atropurpureum are on their own roots, the others are grafted. We especially recommend our pot-grown plants as they are more successfully transplanted than the field-grown stock.

12 to 14 ft., 2 to 2½ in. cal., branched 7 to 8 ft.....	12 50	100 00	

The Cedrelia is not known as it should be nor is its value recognized. It seems to be perfectly hardy in the North and we have never known it to be attacked by insects or caterpillars. In cities where the streets are narrow and under the most adverse conditions, it thrives equally as well as the Ailanthus and its flowers are entirely free from that disagreeable odor.

12 ft., 3 to 3½ in. cal., branched 4 ft.....	25	00	

All of these varieties of Linden have been transplanted within the last two years. They have perfectly straight trunks and nice heads and as they have single stems right to the top of the tree, they can be trimmed higher if necessary. The dasystyla is an excellent variety for street planting, the leaves are leathery and tough and are never attacked by insects. They remain green until a hard frost, then they all fall at one time.

Virgilia lutea (See Cladrastis tinctoria)

Deciduous Shrubs

We continually try to impress upon our customers the fact that the mere height of a shrub does not indicate its value, but that its "bushiness" must also be taken into consideration. Shrubs grown closely in nursery rows must necessarily make height but the "bushiness" is sacrificed. A good, bushy, two to three-foot shrub is worth as much as a "slim" three to four-foot plant and for results it is worth more.

We grow our shrubs in wide rows and allow plenty of space between the plants in the rows to permit them to develop properly. It costs more to grow shrubs this way than where they are grown closely together, as we cannot plant as many on an acre. In comparing our prices with those of other growers, this fact should be given consideration.

"Heavy" shrubs indicate those which have been given extra room in the nursery rows. "Specimens" are those which have been planted about four feet apart and are useful where something is required for setting out as an individual plant.

Double Flowered GHENT AZALEAS

— CASE LOTS —

Fifty Plants in a Case. Five each of Ten varieties.

ASSORTED COLORS

Height 15 to 18 inches: very bushy

Ready for Shipment after March 1st, 1910

Price \$25.00 per Case

Sold in Case Lots Only

The double flowered Ghent Azaleas are not new, but they have never been largely offered. They are among the most beautiful of the Azaleas and the colors range through all shades of White, Yellow, Pink, Crimson and Red.

To create the best effect, they should be planted in groups of three or five, or one or two beds may be planted with twenty-five or fifty plants. A mulch of well rotted manure, hay or straw, leaving it on the beds during the summer and winter is beneficial.

List of Varieties in each Case as follows:—

- 5 ARETHUSA, Rose with Yellow
- 5 BARTHOLO LAZZARI, Flesh
- 5 BIJOU DE GENTBRUGGE, Rose
- 5 DR. STREITER, Carmine Rose with Orange
- 5 LEIBRITZ, Carmine with Yellow
- 5 MINA VAN HOUTTE, Cherry Red
- 5 NARCISSIFLORA, Yellow
- 5 OPHIRIE, Yellow with Salmon
- 5 RAPHAEL DE SMET, Rosy Red

HIBISCUS MEEHANI VARIEGATA

New Single Flowered Variegated Leaved Althaea.

This new variety of *Althæa* has proven very attractive since we first offered it two years ago. The leaves are variegated with green and white just the same as the old double flowered sorts, but its great beauty lies in the fact that the flowers, those single, open wide, being no less than four inches in diameter, while the flowers of the old double sort do not open at all. The color is a lilac pink. For prices see list of *Hibiscus*.

Evergreens

We feel that we cannot say too much of our evergreens. We give particular care and attention to their culture, transplanting them as frequently as may be necessary in order to secure an abundance of fibrous roots. To this end they are transplanted every two years, and frequently sheared so that they have a good compact and shapely appearance.

All evergreens are dug with ball of earth and the ball sewed in burlap, the cost of which is included in the prices shown in the catalogue.

Yucca filamentosa, Adam's Needle

4 year	75	6 00
--------------	----	------

Vines and Climbers

Our vines are all transplanted plants. We handle them just as we do shrubs, grow them for one year, then transplant them into regular nursery rows, give them plenty of room so that we may get a good bushy well-rooted plant.

Particular attention should be given to the pot grown vines which we offer, they are good bushy plants, grown one summer in five-inch pots or larger as may be required. Many planters prefer pot grown plants for setting out in the Fall, as they are less liable to "heave out" with the frost than field grown stock, and besides this these plants will produce a stronger and more vigorous growth next Summer than the field grown stock.

When shipping these plants we knock them out of the clay pots in which they are grown and put them in paper pots. In this way the plants are delivered to customer with the ball unbroken.

Hardy Herbaceous Perennials, Ornamental Grasses and Ferns for planting in

borders, beds, rockeries, along streams, around the margins of lakes, in fact there are few positions that may not be improved by the proper selection of this class of plant.

In addition to the following list we have an immense collection. Send us your list of wants and let us quote upon them.

This department of our nursery has maintained a steady growth and improvement for the last twenty years, and is now in a high state of efficiency for supplying the very best stock.

Every year we add to our collection the various novelties, but do not catalogue them until they have had a thorough test.

Good strong thrifty plants, skillfully packed, is what you will get when you order from us. Not merely plants for setting out in the nursery rows, but plants that will give immediate results.

July to September, etc., indicates the period of flowering.

RAFFIA

“RED STAR” BRAND

This brand needs no recommendation—all nurserymen know it and almost everyone uses it. It is the best brand on the market and cheap at the price. Do not forget that we guarantee every bale to be first-class quality, long, wide strands of good color and strength, and if a bale does not prove as represented, we take it back and refund the money.

IF YOU WANT THE BEST, ORDER “RED STAR” BRAND

PRICES FOR “RED STAR” RAFFIA

1 lb. at 18c. per lb.	50 lbs. at 11c. per lb.	2 bales at 8½c. per lb.
25 lbs. at 12c.	100 lbs. at 10c.	5 bales at 8c.
1 bale (about 225 lbs.) at 8¼c. per lb.		

THE “HANDY” TREE CALLIPER

For measuring heavy grades of trees. Callipers by ¼ inches from 1¼ to 3¼ inches. No regulating, no adjusting. The handiest, quickest and best calliper on the market. Made of aluminum.

Price, \$1.00 each

THE “HANDY JR.” TREE CALLIPER

Exactly like the above, but callipers only from ⅜ inch up to 1 inch.
Price, 65 cents each

The Best Nursery Spade

Either Square or Taper Blade

Send Your Order Now. Don't Leave it Too Late

D Handle, Double Strap, Reinforced Nursery Spade. Weight, 9½ lbs.

We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. We have been using this spade for a number of years, and it will stand more hard work than any other make. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted. Price, \$1.50 each; \$17.50 per doz.

PRUNING KNIFE "B"

This knife is made for nurserymen who want a strong tool and a keen edge. It has a strong oil tempered blade, round handle and steel cap on the end; in fact, it is the strongest pruner made. Price, 85c. each; 6 for \$4.75.

BUDDING KNIFE "D"

Next to the "Special" here is the knife for budders. Has a cocoa handle, a razor steel blade which closes, and the end of the handle is tapered to form a wedge for raising the bark. Price, 35c. each; 6 for \$2.00.

PRUNING SHEARS "F"

This is a forged steel pruner; patent spring of wonderfully easy, but powerful working capacity. This pruning shear will outwear two of any other style. Price, \$1.00 each; 6 for \$5.75.

Send for Special Catalogue of Nurserymen's Supplies

Specimen Evergreens

We ask particular attention to the section of our catalogue devoted to EVERGREENS. Our evergreens are frequently transplanted and many of the varieties, such as Retinispora and Arbor Vitae are sheared every two years so as to keep them compact and in good form.

Retinispora pisifera aurea.

To successfully transplant evergreens they should be dug with a ball of earth and the ball sewed in burlap, even the small sizes are handled in this way. *No extra charge is made for this work, it is included in the catalogue price.*

In many varieties of our evergreens we offer them in large sizes, six, eight and ten feet, this is particularly the case with Retinisporas and Arbor Vitae.
